

What's Happening Here!

MARCH Newsletter

"Communication for Life"

97 Years Strong Thanks To YOU!

Rochester Hearing and Speech Center is delighted to introduce our first edition of the RHSC newsletter in almost ten years! We intend to share it via email monthly to keep you in touch with all that is happening here at RHSC. We will also include amazing and important insights into the audiology and educational/clinical services industries for your information. In addition, we invite you to like us on Facebook, where you will find lots of interesting posts each day.

This publication also serves as a testimony to how our donors are making an impact with every dollar they invest in RHSC. Our doors have remained open for almost 100 years because of our donors' generosity.

We are 97 Years Strong and invite you to come on our journey to our centennial anniversary!

"Check Your Hearing - All Year Long!"

World Hearing Day may be for one day in March, but here at Rochester Hearing and Speech Center we are celebrating all year long encouraging everyone to get their hearing checked. Getting your hearing checked is just as easy as when you get your eyes checked and teeth cleaned.

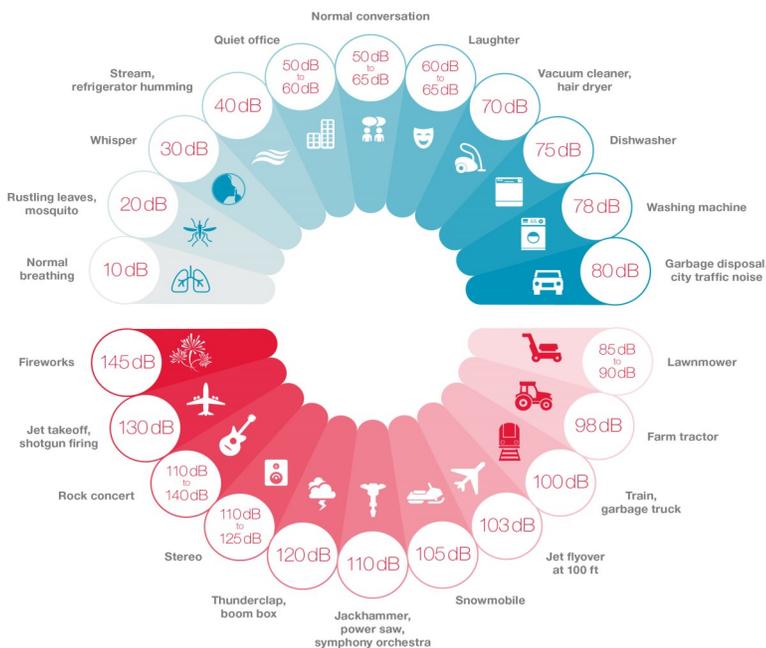

A normal conversation is about 60 dB, a lawn mower is about 90 dB, and a loud rock concert is about 120 dB. In general, sounds above 85 dB are harmful, depending on how long and how often you are exposed to them and whether or not you wear hearing protection, such as earplugs or earmuffs. The chart below gives you an overview of how loud is too loud!

Our knowledgeable Audiologists can answer all your questions.

We have three locations (Brighton, Greece, and Webster) where you can schedule an appointment.
