Hearing Loss and Heart Disease

February is National Heart Month!

"Research has shown correlations between heart health and hearing health. In a 2017 study published in Clinical Otolaryngology, it was determined that cardiovascular disease and some of its risk factors were found to be associated with hearing loss. So if you have heart issues it's important to get your hearing checked and vice versa."

- Dr. Mallory Sabin, Au.D., CCC-A
(Clinical Audiologist, Board Certified - RHSC Webster, NY Office)

If you've never had your hearing checked or you think it might be impacting your balance or overall health, book your hearing test today by clicking the contact us button below.

I cannot say enough about how grateful and how pleased I feel to have her working with Suleiman and our family. Amy is the best therapist I have met.
